

Geoffrey Hinton

Geoffrey born
December 6th
1947 in
Wimbledon,
London.

Currently he is considered as

Geoffrey Hinton

“The Godfather
of deep learning”

Deep Learning

It was born as the idea:

Is no longer necessary
to program a machine,
you can let it learn by
itself, as the brain
does.

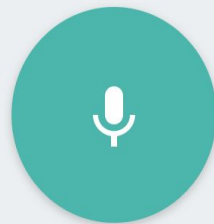

his work is applied in neural networks

speech recognition

do a google search

Speak now

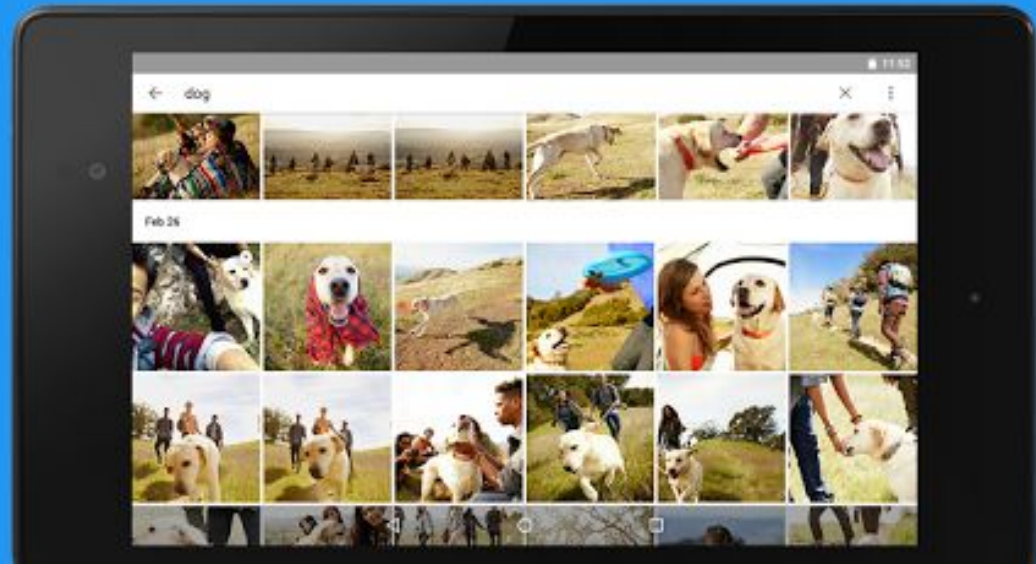

Google

search by what you remember

the neural
network known
what is in the
photo

Search by what you remember

Google Translate

They recently started using neural network and is now more precise

Google Maps

find a address

Google Assistant

because I admire?

for his work in deep learning.
